SPECIALIZED EXPERIENCE

EMDR (Eye Movement Desensitization Reprocessing) Basic Training Certified

Eye Movement Desensitization and Reprocessing (EMDR) is a psychotherapy treatment that was originally designed to alleviate the distress associated with traumatic memories (Shapiro, 1989a, 1989b). Shapiro's (2001) Adaptive Information Processing model posits that EMDR therapy facilitates the accessing and processing of traumatic memories and other adverse life experience to bring these to an adaptive resolution. After successful treatment with EMDR therapy, affective distress is relieved, negative beliefs are reformulated, and physiological arousal is reduced. (July 2016)

Spanish Language Fluency

Experience conducting clinical interviews, team family evaluations, and individual psychotherapy with Spanish-speaking persons in inpatient and outpatient settings,

including San Antonio State Hospital, University Hospital, university counseling centers, schools, and nursing homes. Experience conducting psychological assessments with Spanish-speaking persons, including standardized and projective tests (Thematic Apperception Test and Rorschach) as well as Spanish equivalents of some psycho-educational instruments. Also experienced in providing supervision to master's and doctoral level counseling trainees providing services to Spanish speaking clients, families, and groups.

French Conversational Fluency

Behavioral Telehealth Services

Experience providing assessment (suicide/homicide risk/discharge readiness), therapy, and providing therapeutic support/recommendations regarding medication management (by prescribing physician) via tele-health technology.

Prolonged Exposure Therapy (PE) – Full two-day advanced training for Evidence Based Psychotherapy (EBP) treatment (March 2013). Center for Deployment Psychology at University of Texas at San Antonio.

Neurosequential Model of Therapeutic™ Case-Based Training Series

Participated in 5 series via live internet presentations (2010-2011). The Child Trauma Academy NMT Case-Based Training Series is a clinical case conference led by Dr. Bruce Perry. (NMT Case-Based Training Series is ten 90-minute sessions; total of 15 training hours). NMT integrates core principles from neurodevelopment, developmental psychology, traumatology, and sociology to address the needs of maltreated and traumatized children. ChildTrauma.org

Management Essentials Program Certificate of Completion, Texas Department of State Health Services Supervisory Training (competitive selection process across Texas) Austin, TX. (Aug. 2007)
