General Information on Assignments

Length

Some of you fret over the length of the assignments and desire a precise definition. I can only provide you with a very general guideline. The writing style of individuals presenting excellent answers/reviews with essentially the same information varies enormously, thus impacting length. The important thing is that you follow the guidelines and grading criteria for book reviews and clearly answer and focus on the question/topic at hand for question assignments. If you do this you will know when you are complete. You will not feel compelled to include extraneous information for the sake of volume.

Book Review

A book review is a description, critical analysis, and an evaluation on the quality, meaning, and significance of a book, not a retelling. It should focus on the book's purpose, content, and authority. A critical book review is not a book report or a summary. It is a reaction paper in which strengths and weaknesses of the material are analyzed. It should include a statement of what the author has tried to do, evaluates how well (in the opinion of the reviewer) the author has succeeded, and presents evidence to support this evaluation.

Book Review Grading Criteria	Maximum Points

Blackboard

The BB site for this class contains the syllabus, assignments, grades, discussion boards, and announcements.

Please submit your assignments through the BB assignment area.

Please take advantage of the book Discussion boards. It is very helpful to exchange ideas, thoughts, and questions with your fellow students. I shall also check-in and enter

the discussion when and if it is not disruptive to student discussion.

University Policy

Please consult your Student Handbook to familiarize yourself with university policy. The professor adheres to all Sul Ross State University policies.
