Course Rationale

The superintendent is the leader and chief executive officer of the school district. As such, that individual must possess skills and knowledge to focus the many influences which pressure the school system to attain maximum educational growth and development for the success of students. Therefore, a focused examination of the role of the superintendent is appropriate.

Course Description

The leadership role of the superintendent will be critically examined as it relates to dealing with the divergent points of view that affect the educational process. Emphasis will be given to identifying the various groups and developing strategies for effectively influencing each to move the district toward a more efficient productive educational system. Also, emphasis will be given to help individuals prepare, obtain, and succeed in the superintendency with a reliance on the *Domains & Competencies* of the **Standards for the Superintendent Certificate** from the Texas State Board for Educator Certification. Finally, the TExES #195 issues will be addressed to assist students in preparing for the certification examination.

- * To analyze the skills and knowledge necessary to be an effective superintendent.
- * To identify competency levels of students related to superintendent skills.
