OFFICE HOURS:

Eagle Pass	T	8:00 AM-4:00 PM
Del Rio	W	4:00 PM-6:00 PM

OR BY APPOINTMENT ANYTIME

I will be available by phone, e-mail or in my office to offer help on any subject related to the course. As we progress in the course, I may make changes to this syllabus to accommodate any particular subject area. In that sense, this syllabus is a guideline, not a contract.

Required Text:

Foundations of Financial Management, 15e Block Hurt Danielsen, McGraw-Hill Irwin
ISBN 978-1-259-19407-8

1. Objectives: The student will be able to:

1. Understand that the field of finance integrates concepts from economics, accounting and a number of other areas. Appreciate that a firm can have many different forms of organization. Identify the relationship of risk to return as a central focus of finance. Be aware of the primary goal of financial managers: maximize the wealth of the shareholders.

Assessment: Written exam, written chapter discussion questions, in-class exercises and quiz.

2. Use financial statements to measure profitability, identify sources of financing and evaluate the change in the cash position of the company. Identify the price-earnings ratio as an indicator of the relative valuation of earnings. Understand that depreciation provides a tax reduction benefit that increases cash flow.

Assessment: Written exam, written chapter discussion questions, in-class exercises and quiz.

3. Explain how ratio analysis provides a meaningful comparison of a company to its industry. Understand ratios can be used to measure profitability, asset utilization, liquidity, and debt utilization. Apply the Du Pont system of analysis toward identifying the true sources of return on assets and return to stockholders. Explain how the use of trend analysis shows company performance over time.

Assessment: Written exam, written chapter discussion questions, in-class exercises and quiz.

4. Identify financial forecasting as essential to the strategic growth of the firm. Use the pro forma income statement, the cash budget, and the pro forma balance sheet to perform forecasting. Understand how the percent-of-sales method can also be used for forecasting on a less precise basis. Explain how the methods of forecasting enable the firm to determine the amount of new funds required in advance.

Assessment: Written exam, written chapter discussion questions, in-class exercises and quiz.

5. Explain how leverage represents the use of fixed cost items to magnify the firm's result. Understand how Break-even analysis allows the firm to determine the magnitude of operations necessary to avoid loss. Identify the use of operating leverage to indicate the extent fixed assets are utilized by the firm. Understand that financial leverage shows how much debt the firm employs in its capital structure and how combined leverage takes into account both the use of fixed assets and debt.

Assessment: Written exam, written chapter discussion questions, in-class exercises and quiz.

6. Explain how working capital management involves financing and controlling the current assets of the firm. Explain how management distinguishes between those current assets that are easily converted to cash and those that are more permanent. Understand that the financing of an asset should be tied to how long the asset is likely to be in the balance sheet.

Assessment: Written exam, written chapter discussion questions, in-class exercises and quiz.

7. Understand that cash management involves control over the receipt and payment of cash so as to minimize nonearning cash balances. Show how the management of marketable securities involves selecting between various short term investments. Explain how accounts receivable management requires credit policy decisions aimed at maximizing profitability. Understand the sources of short term financing.

Assessment: Written exam, written chapter discussion questions, in-class exercises and quiz.

2. Course Assessment:

- a. Assignments: Selected exercises will be assigned to help in the understanding of the course materials.

- b. Exams: These will not be cumulative (except to the extent that one part builds upon another). There will be unannounced quizzes either at the beginning or the end of class. Exams will be scheduled as we progress during the semester.

2. **Note: It is a policy for this course that after the due date there will be no make-up or reposition for the work required; this policy includes, assignments, exams and quizzes. Class participation is mandatory. There will be roll call and perfect attendance will count toward a class participation grade. After four (4) absences the student will be dropped from the course.**

3. Course Grading:

The projected cutoff point for A's, B's, C's, and D's are based on a 90%, 80%, 70%, and 60%, respectively.
