

**Art Studio Concentration: Ceramics**  
**Arts 3301-002**  
**Spring 2017**

**Schedule: T-TR 2:00pm - 4:50pm**

**Location: Art Annex: Ceramics/Sculpture Building (CSB) room 00102**

**Instructor: Gregory Tegarden**

**Contact: Office: FAB 010, 432-837-8405 or Art Annex, (Studio): 432-837-8280\_**  
**[gtegarden@sulross.edu](mailto:gtegarden@sulross.edu) please put "Ceramics" in the subject heading.**

**Office Hours: 8:00am – 9:00am M/T/W/TR or by appointment.**

**Final Exam/Critique: Monday, May 8th @ 3:00pm. The time might change but the day is set in stone! All students must attend. No exceptions.**

**Text: None required.**

**Course description:**

This course is an introduction wheel thrown ceramics. It is designed to teach you, or allow you to learn, to throw, and to throw a variety of forms that conform to the dogma of "good form." By conforming to certain criteria the student will bring about pots that are functional, while training the eye, and the hand in making aesthetic decisions on what is fine art in ceramics. In short this course takes the philosophy that good art can be built on skill and training. The course will further your understanding of glazes through lectures and testing and will expose you to historical and contemporary functional pottery. Stoneware clays and slips will be used. Most work will be glazed and fired to cone10 in reduction or soda kilns. The studio is a community so working well with others will be a skill that gets reinforced. Students, working in groups, will prepare and mix clay as needed during the semester. Students will also as a group, learn to unload and load bisque and glaze kilns. Students will use the gram scales and will learn to prepare glazes. Lectures on glaze materials and glaze composition will be given. Significant out class time will be required.

**Student Learning Outcomes:**

1. Student will become competent in basic throwing techniques.
2. Student will learn the dogmatic criteria for what "good form" is in regards to functional ceramics.
3. Student will use clay and a variety of slips and glazes in order to gain knowledge of the medium as a whole.
4. Student will continue to gain the sensitivity to be able to gauge the appropriate wetness of the material for a particular process.
5. Student will successfully work with form, proportion and surface in three-dimensional ceramic object.
6. Student will learn communication and teamwork skills in the studio environment.
7. Student will become more aware of the scope of historical and contemporary ceramic art.
8. Student will have an increased competency in loading and firing kilns with a broader understanding of the firing process.
9. Student will continue to gain an understanding of the scope of the medium and

philosophical issues surrounding the field.

**Art Program Primary Learning Outcomes**

**PLO #1**

Students will demonstrate expressive characteristics in the visualization of ideas by developing a body of art work within an area of specialization. This will be accomplished through production of original artworks, written appraisals, group discussions, and oral justification of their work.

**PLO#2**

Students will demonstrate formal competence in applying creative thinking and problem solving skills using the elements and principles of art & technical skills in two and three-dimensional design. This will be accomplished through production of original artworks, written appraisals, group discussions, and oral justification of their work.

**PLO #3**

Students will demonstrate their ability to manipulate a particular medium creating a personal and original artwork. This will be accomplished through production of original artworks, written appraisals, group discussions, and oral justification of their work.

**PLO#4**

Students will demonstrate proficiency in the use of written composition, language skills, and research methodology focused on historical and critical discourses, which will further the students proficiency in professional practices. This will be accomplished through production of original artworks, written appraisals, group discussions, and oral justification of their work.

**Evaluation:**

You will be graded on participation (which includes work related in the upkeep of the studio and in class discussions), 8 projects (Greenware completion,) a midterm test and the final critique (all finished GLAZED work). Details and demos on each assignment will be presented when assigned.

<b>Participation:</b>	<b>20%</b>
<b>Projects (Greenware Critiques 8):</b>	<b>30%</b>
<b>PowerPoint Presentation</b>	<b>10%</b>
<b>Final Critique:</b>	<b>40%</b>

**Participation:**

I expect all students to participate in discussions, and if you rarely or never offer thoughtful comments or questions, you will only get half credit for your participation grade. If you aren't comfortable speaking in front of the class, please come talk to me. I also expect you to work well with others and to help each other out while maintaining the studio. This will be the other half of your participation grade.

**Power Point Presentation:**

- Presentation on your work, a contemporary ceramic artist, or process...
- Time minimum 5 minutes, maximum 15minutes.
- Includes images of work.
- Presented to the Ceramics Ii class. Must make arrangements with professor in regards to date.

**ASIDE:** There will be opportunities to earn extra credit by attending art events.

## **RULES AND EXPECTATIONS:**

Students will be expected to have a sketch/notebook every day in class with a writing implement. The sketch/notebook will hold all class handouts student's notes and sketches. Students arriving without a notebook may be recorded as absent. We will not wait as students go to get sketch/notebook or pencils. Taking careful notes during demonstrations and using them will greatly improve a student's success. Sketching is also a good practice for a student to implement into their making process.

Completion of all projects assigned. See grading sheet.

There will be a critique given after each project- attendance is mandatory. Failure to attend class on critique days is excusable only in cases of dire emergency i.e., severe illness or a death in the family. Students missing the final exam should expect their grade to be lowered a full grade.

### **All work must be marked with a student's initials or stamp.**

Participation in preparation of clay and glazes for class use; students will be assigned a mixing partner or partners and will mix clay or glazes as necessary at least once during the semester. Do not waste work; avoid putting usable clay in slop barrels.

Participation in loading and unloading of class kilns

All project work and outside work to be graded must be available for review at the end of the semester. Due to space limitations fired finished work may not be stored in the ceramics studios. If work will not fit in lockers, students must make other arrangements for safe storage- i.e., take work home, etc. Again, all work must be available for review at semester's end.

Studio Safety and Hygiene: we will read, sign, and hand in the student agreement, attached.

All students are required to clean up their work areas before leaving the studio and do other studio cleaning as necessary. At the beginning of the semester all students must be checked off before leaving class.

All work, tools and other belongings, must be removed from the studio the last day of finals week by noon. (In the summer session by the end of the day of finals). The studio will be cleaned and remaining personal belongings and clay work may be thrown out.

### **BREAKAGE, LOSS, FIRING ACCIDENTS:**

Ceramics is fragile; firing is difficult and full of unknowns, especially in a group situation. It is inevitable that some pieces will be lost, broken, or misfired. While losses are regrettable they will happen. The faculty and Sul Ross State University cannot be held liable for such accidents. Students should handle work carefully and as little as possible. All work must be marked with a student's initials or stamp.

### **LOCKERS:**

See me to reserve a locker in the dog run. You will need one.

### **STUDIO HOURS:**

You may use the Ceramics Lab any time when the studio is open except during class time for the other sections of Ceramics or during floor cleaning. We will try to work on the buddy system... if some is using the studio you are welcome to be in there...the last person out shuts all doors and turns out lights. If the studio is locked you are out of luck. **You may not use any power tools (except glaze mixer drill) while unsupervised by your professor. You may not load, unload or fire a kiln with out professor's approval.**

**This class will involve work in the studio outside of class time.**

The building will be open nights and weekends. Check on the front door or with me for more details.

Ceramics is a time sensitive medium. Allowing projects to dry slow and even makes work less prone to cracking and easier to manipulate. Consequently work completed late in the semester will have a greater chance of cracking in the drying process. It is often possible to finish a piece in a small fraction of the time it would take to do it in one week if you spread the work out.

Occasionally there is too much work to fire in the last week. If the work was glazed before the last day to glaze and it was on the racks to be fired before the last day for them to be placed there it will be graded as if it was glaze fired. Work still needing firing may be brought back into ceramics at the beginning of the next long semester for firing. It may not be left in the studio between semesters. Work left in the studio between semesters will be thrown away.

**Attendance:**

Nine absences result in you being dropped from the course with a grade of “F” as per university policy. Upon the 4<sup>th</sup> unexcused absence you will be dropped one letter grade. Upon the 6<sup>th</sup> unexcused absence you will be dropped another letter grade. And upon the 8<sup>th</sup> unexcused absence you will be dropped yet another letter grade. Plain and simple... attendance is crucial to your survival in this course.

If you must miss a class for a school-related activity, the absence must be discussed (and arrangements made regarding coursework) prior to the absence. If you must miss a class for an emergency or illness, please contact me by email or phone as soon as possible and provide documentation (such as a doctor’s note). Late work will not be accepted, unless you have contacted me about extenuating circumstances before the due date. Extenuating circumstances will be considered on a case-by-case basis.

**Arriving to class on time is essential. Being late three times will count as an unexcused absence.**

**Students are expected to attend the entire class time unless they have made prior arrangements with me in advance. Students who leave early or get up and leave class for any other reason without notifying me will be counted as absent for that day.**

There will be no “make-up” work allowed unless your name appears on the explained absence list. It will be the student’s responsibility to contact the professor and make the necessary arrangements.

Plagiarizing, cheating, or any other dishonest behavior in the classroom will not be tolerated. Rules and regulations regarding plagiarism, dishonesty, and other issues concerning classroom participation can be found in University Rules and Regulations and Student Handbook. A student found to be engaging in these activities will be penalized to the full extent of university policy.

My recommendation about cheating, is **DON’T** do it. It is not worth it! In my opinion, academic honesty is of the utmost importance. My personal policy is to give you a failing grade in the course if you are caught cheating on an examination or plagiarizing in a paper. My advice to you is to do the best you can on your own. When in doubt about how to reference information from outside sources, please ask my advice. I am more than happy to help you.

**Interruptions due to electronic devices will not be tolerated...this includes text**

**messaging! Turn phones OFF! The only exceptions will be emergency personnel and official university business.**

**Earbuds are not allowed during class time for safety reasons.**

**ADA NEEDS:**

It is Sul Ross State University policy to provide reasonable accommodations to students with disabilities. If a student would like to request such accommodations because of a physical, mental, or learning disability, please contact the ADA Coordinator Marry Schwartze in the Ferguson Hall, room 112 or call (432) 837-8691. Email: mschwartz@sulross.edu.

Please relate all requests for special accommodations to the instructor by the third class period.

**LAB FEES**

There is a \$105.00 lab fee for Ceramics II. This fee will cover clay, glaze materials and firings of work done for class only. All lab fees must be paid into the Art Stores Account at the Cashier's office in BAB and a receipt provided to the professor no later than Friday, January 27, 2017.

**Tools: Mark all tools with a permanent marker.**

This list is intended only as a guide- you may find you need or want other tools.

Potters tool kit.

Serrated rib

1 gallon bucket (minimum.) The bucket should be big enough to really clean your hands but not so big that it is too tall to get your hands inside of.

Thin plastic drop cloths (.03 mm) for covering work.

Rubber gloves available for glazing.

Work clothes: You might want to keep a change of clothes that you can get very dirty in your locker, also closed top, sensible shoes. You cannot mix clay or use potter's wheels wearing sandals or high heels or loose clothing or hanging jewelry.

Hair control devices: long hair must be tied back when using potter's wheel, mixing clay, using the grinder, or firing kilns.

## **Assignments**

### **Intro-Assignment**

Ten cylinders at least six inches tall. They must have relatively even walls and a flat floor. Make prints of these and get them checked off. This assignment is strictly a completion grade. Remember that the ability to throw a good cylinder is determined by looking at the entire body of work at the end of the semester. Finishing this assignment is required before moving on to Assignment two.

### **Assignment 1: Tumblers, 10**

Ten cylinders at least six inches tall. These can be made in any style but must be

functional. They also need to be done as a set. Now since we are making fifteen, they don't all have to be done as one set. You can make two or three sets.

The cylinders should have walls with even thickness of 1/8 - 1/4 inch thick. Thinner is acceptable but evenly thick walls is an important goal. The pots **may not be trimmed**. Weigh your clay and keep your ball size constant. Work to get the floor the same thickness as the wall. Learn to use the wooden cutoff tool to produce a neat bottom edge.

The bottom edge should be smoothed when the pot is leather hard. The center of the bottom should be tapped to cause it to curve up slightly.

If you slide your pots onto a board, make sure it is a clean unfinished (no paint) wooden board and not a plastic bat. The wood will draw water from the bottom of the pot and dry it. After the pot has sat on the board a short (1 hour) while come back with your wire and recut but do not attempt to cut it off with a wire again after it has sat on the bat for more than three (?) hours. The wire will rise up and may slice through the floor.

Rims. You are learning to make "good pots". **Rims are perhaps the most important part of a pot after form, maybe even more important than form**. A good rim serves the function of the pot. In pouring pots such as pitchers and teapots the lip that is poured over may have a sharp edge to prevent drips, but this makes the lip prone to chipping. In all other forms including cups the rim should be rounded. You probably do not want a rim that will cut your lips. Use a balloon or chamois on the rim and make it round and a pleasure to put against your lips. Often anemic rims can be saved by good use of a chamois, but learn to leave a little meat at the top of your walls to make the rim from.

**Learning objectives** in this assignment (and most of all the other assignments) are to begin thinking about the process of making the same form a number of times. This is done to train your hands to do your bidding and not the clay's. It will also train your eye to start picking up the subtle differences between each like form. It helps to edit pots that don't meet your criterion also. Remember not all pots thrown will be fired.

## **Assignment 2: Cups with handles, 10**

Ten drinking vessels with pulled handles. This means make many more and keep the best. These will be done in three sets.

The vessels should have walls with even thickness 1/8 - 1/4 inch thick. Thinner is acceptable but evenly thick walls is an important goal. The pots **may not be trimmed**. Weigh your clay and keep your ball size constant. Work to get the floor the same thickness as the wall. Learn to use the wooden cutoff tool to produce a neat bottom edge.

Dry the pots just to the stage where handles can be pulled on them without distorting them. The wetness is critical. Too dry and the handle may crack at the upper attachment, too soft and the pot will distort.

The handles should be pulled with soft aged clay. If the clay is only 2 days old, don't

bother. You can always use slop dried on a board or bat. Wedge it well. Roll your carrot on dampened canvas or on Formica. If the surface of the carrot is dry the handle will crack when it is bent. Score and slip the pot with rather thick slip. Do not slip the carrot. This is one of the purposes of using wet clay. Make sure you roll the carrot onto the pot to expel air. Before you begin to pull have a tad of slip on your serrated rib for attaching the bottom of the handle after pulling.

The dogmatic "good handle" has an attachment that looks like a branch leaving the trunk of a tree. There is a much thicker attachment than the cross section of the handle. The bottom attachment is more flexible. It can look like the top or be thinner. Only bend the handle once. If you bend it twice or try to correct the curve it will lose the freshness of its spring. Practice making handles before you try them on your good cups.

The bottom edge should be smoothed when the pot is leather hard. The center of the bottom should be tapped to cause it to curve up slightly.

**Learning objectives** in this assignment is to further the understanding from assignment one and to learn the aesthetics of handles in relationship to a pot.

### **Tips**

You can practice handles on bricks, cans, or some other non-cup that you are not going to keep. It is much easier when the stress is lower. When you can do three in a row without screwing it up, start with your worst cup. Start practicing pulling handles early.

### **Assignment 3: Teabowls, 15**

Throw fifteen teabowls and trim feet on them. Sets are not required in this assignment, but if you find a form you enjoy see if you can repeat it. Ample clay must be left on the bottom for trimming (at least 3/4 of an inch, if your pots are wobbly, more). These pots should be dried to trimming stage slowly (at least 3 days). If the pots have dried quickly (less than two full days), they should be placed tightly under plastic and allowed to become evenly hard. **You may NEVER trim bone-dry pots** for use in this class; they must be trimmed before they are bone dry. It makes too much dust. **Pots trimmed bone dry will not count towards a grade in this class.**

Feet should be trimmed so that the outside of the form conforms to the inside with even walls. The foot-ring should be out far enough to give the pot a steady stance, and should be tall enough that there is at least 3/16's of inch clearance between the body of the pot and the table.

Experiment with types of forms, surfaces, rims and feet. These, your first twenty teabowls, if they look like twenty different people made them it are ok.

Teabowls are a standard form in the United States for loosening up you're throwing and starting out a new body of work or when in school a new semester. They need not take more than a few minutes each to throw.

### **Tips**

Make sure your pots are the right hardness to trim. Do not dry them too quick. If the outside is stiff and you trim into soft clay you have dried them too fast. It will take at

least four days to dry pots well to trim them.

This assignment does not require great skill in throwing but it does require that you learn to trim. Leave enough clay at the bottom of the pot to trim good feet.

Practice trimming early. See the exercise below. If you are having trouble, make sure the pot is centered before trimming and keep the wheel speed up around what you would use for opening.

#### **Assignment 4: bowls, 10**

Throw ten round bottom bowls and trim feet on them. Successful bowls will have continuous curves, well trimmed feet and considered rims. They will have even walls and well-sized and detailed feet.

##### **Tips**

Learn the sequence required to get a smooth inside curve with little hump or slump.

Concentrate on the curve of the floor.

Trimming is easier when the curve is smooth

Aged clay really helps with bowls.

#### **Assignment 5: Plates, 8**

Throw eight plates with trimmed feet. The plates have to be at least eight in diameter.

#### **Assignment 6: Lidded Jars, 5**

Make a series of five jars with flanges on the pots. Be as precise as you can when throwing so that the lid fits the pot snug. Learn to make a gallery for the lid with a good profile.

#### **Assignment 7: Teapots, 2 and tea bowls, 2 for each teapot**

Make three teapots. All attachments should be thrown excluding the handle. The teapots should hold at least two cups of liquid. Revisit the teabowls from assignment four and make a set for each tea pot.

#### **Assignment 8: 3 Extra projects**

Three extra projects that can be anything you chose but has to be OKed by me in a contract. Let me know what you want to do early so you can get help if needed.

### **Students will learn these artist's and thier typical work:**

#### **Artists**

Shoji Hamada

Bernard Leach

Michael Cardew

Mark Hewitt

Peter Volkous  
Richard Notkin  
Akio Takamori  
Rosalie Wynkoop  
Linda Arbuckle  
Clary illian  
Gail Nichols

**Historic:**

Shino  
Oribe  
Shigaraki  
Leach school  
The Archie Bray Foundation

**STRONGLY SUGGESTED TEXT**

*A Potter's Workbook*, by Clary Illian, University of Iowa Press. You can get this book used for about fifteen bucks on Amazon. In my opinion it's one of the best out there.

**SUGGESTED TEXTS:**

*Ceramics Monthly Magazine* PO Box 12448 Columbus Ohio 43212

*A POTTER'S BOOK*- by Bernard Leach. A classic, this book was the inspiration for many of these centuries' greatest potters. It has some very good basic information, but is better as an expression of a philosophical stance towards pottery

**Please note that this syllabus is subject to change.**

## **Art Studio Concentration: Ceramics Arts 3301-002**

**Schedule: T-TR 2:00pm - 4:50pm**

**Location: Ceramics/Sculpture Building (CSB) room 00102**

**Instructor: Gregory Tegarden**

**Contact: Office FAB 010, 837- 8405 or Art Annex 837-8280, gtegarden@sulross.edu  
(please put “Ceramics” in the subject heading)**

**Office Hours: 8:00am – 9:00 am M/T/W/TR or by appointment.**

**Final Exam/Critique: Monday, May 8th @ 3:00pm. The time might change but the day is set in stone! All students must attend. No exceptions.**

**WEEK 1 Introduction**

1/17 Syllabus review

1/19 back to basics... “getting to throw you...”

**WEEK 2 Throwing on the wheel again.**

1/24 Produce 10 prints of cylinders due Tuesday the 28

1/26 Studio work...prints

**WEEK 3 Start throwing cylinders**

1/31 Turn in prints and throw to keep

2/2 Studio work cylinders 10

**WEEK Handeled Cups**

2/7 Critique Cylinders, cups w/handels 10, demo

2/9 Studio work... cups w/handels 10

**WEEK 5 Teabowls**

2/14 Critique Cups w/handels, teabowls 15, demo

2/16 Studio work... teabowls 15

**WEEK 6 Bowls**

2/21 Critique Teabowls, bowls 10, demo

2/23 Studio work...bowls

**WEEK 7 Plates**

2/28 Critique bowls, plates 8, demo

3/2 Studio work...plates

5/4 Dead Day

**WEEK 17** Final

## 5/8 Final Exam/Critique: 3:00pm

\*Dates subject to change.

## SAFETY RULES AND STUDENT AGREEMENT.

The studio telephone may be used to call campus emergency. The number **8011**. The off campus emergency number **911** may also be used.

- \_\_\_\_ Read sign, date, and hand in one copy, keep top copy for your information.
- \_\_\_\_ Students will not glaze the interior of any object that can hold liquids with glazes marked "NEVER a liner".
- \_\_\_\_ Clay dust is hazardous. No brooms or brushes may be used to clean. Wet clean only. Do not trim bone-dry pots.
- \_\_\_\_ No chemicals, clays or glazes may be brought into the ceramics studio without the instructor's permission.
- \_\_\_\_ No kilns may be fired without the instructor's permission.
- \_\_\_\_ Students may not use dry glaze chemicals without the instructor's permission. Permission to use materials in containers without a black band must be obtained each time the material is used.
- \_\_\_\_ **Beginning students may use supplied dust masks for mixing dry clay and glaze materials. Graduate, Advanced and Intermediate Students are required to own and wear HEPA® quality respirators when handling any dry materials.** If you have a heart or respiratory condition, consult your doctor before using a respirator or dust mask.
- \_\_\_\_ No food in the ceramics studio. When using glaze materials students should wear gloves and wash their hands after using them. Clothes with glaze materials on them should be changed after class.
- \_\_\_\_ Safety goggles or face shield must be worn when using the grinder, looking in a kiln spy hole, or cleaning kiln shelves.
- \_\_\_\_ Long hair must be tied back and/or covered securely when using the clay mixer, grinder, or when firing kilns.
- \_\_\_\_ Clothing made from synthetic materials may not be worn when firing kilns.
- \_\_\_\_ Closed toe, low-heeled shoes... "sensible shoes", are required to be in the studio. Loose clothing, loose skirts and hanging jewelry are not safe when mixing clay.
- \_\_\_\_ Students are forbidden to put hands, tools, or any parts of their bodies inside the clay mixer when it is running.
- \_\_\_\_ No storage of personal belongings in the ceramics studio. Personal items in classroom may be kept only on

shelves assigned to each student. It is recommended that students keep tools locked up. The instructor and the University are not responsible for lost or stolen items.

\_\_\_\_ Gregory's studio should not be entered without permission.

\_\_\_\_ Students will remove all of their work from the studio by the end of the last day of final exams. No materials will be left in the Ceramics studio between semesters. Any work or belongings left in the studio after 3:00 PM the last day of finals will be thrown away.

\_\_\_\_ Children and visitors are never allowed on the potters wheels or in the glaze area. Visiting children must be closely supervised. No visitors may use the equipment or materials without special permission of the instructor.

\_\_\_\_ No smoking in the kiln yard, sculpture scrap yard, or anywhere on campus except in personal vehicles.

\_\_\_\_ No drugs or alcohol allowed in the studio or on one's person at any time. If the professor smells or believes that a student is intoxicated in any form the professor reserves the right to send the student home regardless of work completed.

\_\_\_\_ The instructor reserves the right to bar any student from use of any or all ceramic tools and materials mentioned if the student is seen using them in an unsafe manner, even if this prevents the student from meeting course requirements and results in a failing grade. Appeals are addressed by the Dean of Students, and the University Safety Officer.

\_\_\_\_ I have read and understand all policies listed here, and agree to conduct myself accordingly.

Signature \_\_\_\_\_ DATE \_\_\_\_\_

Printed name \_\_\_\_\_ Contact # \_\_\_\_\_
