Distance learning (Online) Absences Statement

Policies in effect for on-campus, traditional classroom instruction courses also apply to students enrolled in distance education courses, including Web-based and ITV courses. The University allows a maximum of 20% absences in a course before an instructor may drop a student for excessive absences. In Web courses, this policy is interpreted as not participating for more than 3 weeks in a long semester, 1 week in a summer session, or 3 days in the midwinter session. Any student dropped for non-participation will receive an F in the course dropped.

Inactivity may include the following

not logging on to the course

not submitting assignments

not participating in scheduled activities

not communicating with the instructor by phone or email, and/or

not following the instructor's participation guidelines stated in the syllabus

ASSIGNMENT DESCRIPTIONS

NOTE: NO LATE ASSIGNMENTS ARE ACCEPTED

Writing Style. APA writing format is required. Written assignments must be typed using one-inch margins, 12-point type, and double line spacing; have all pages starting with the title page numbered; and be edited for spelling, punctuation, and grammar. **Papers with multiple errors and/or high (over 10%) similarity report (SafeAssign) will receive a reduction in grade.**

SafeAssign

What is the Safe Assignment Tool?

The Safe Assignment Tool is an advanced plagiarism prevention system deeply integrated with the Blackboard Learning Management System. SafeAssignment compares student papers submitted to Blackboard against an enormous wide range of sources and provides instructors with detailed Originality Reports.

Because of SafeAssignment's flexibility, this product is an effective plagiarism prevention system that helps instructors to raise student awareness about plagiarism and to educate students about the ways to avoid plagiarism.

You can check your similarity report and make corrections if needed. With your similarity report, you will note highlighted areas that have similarity noted between your paper and another source. You will click on the tab within the colored square to see the percentage of the similarity. Percentages above 10% must be corrected. It does not matter if the source that is being noted for similarity is not the same source that you used. The system is telling you what you have written is too similar to another source and you need to make corrections. You may need to change up some of the wording or order of information to make it your information. More than three or four words in a row that are identical to the originating author can be detected. You can submit your paper as many times as you would like.

This system is designed to assist students with increasing awareness of plagiarism. Typically, plagiarism is an accidental occurrence and occurs when students do not realize their writing is overly similar to another source.

Summary of DNA Analysis – Due Monday, August 5. Students will provide a summary of your DNA results. Most DNA results will include 3-5 sections of information – Summarize each section without commentary or opinion. Just provide a summary. **Keep in mind that your results take 6-8 weeks to process so time is of the essence.**

Cultural / DNA Analysis Paper – Due Monday, August 12. The purpose of this assignment is to explore and integrate information related to your cultural heritage with issues related to becoming a sensitive multicultural counselor. The assignment is divided into three parts:

- (a) Personal cultural experience
- (b) Cultural heritage identified VS DNA Analysis
- (c) Development as a sensitive multicultural counselor

Specific questions are provided below to stimulate your thinking across a range of cultural factors. Respond to each of the questions as appropriate.

Section C, does have specific questions that you need to address, these questions are not optional. (Remember, sometimes the fact that something is **not** valued is as meaningful as the fact that something **is** assigned value). Include additional information as needed to **complete a picture of your family heritage and personal cultural experience.** At the close of this section, I will address

confidentiality and privacy. This paper should be a minimum of **10 pages** in length, excluding the title page and reference section.

Personal cultural experience: In this section, address family and community values that have been part of your personal experience. Family should be addressed in the context of your extended family and include persons who assumed a familiar role in your development. Family would include your current “family” as well as your family of origin. Respond to each of the following questions as appropriate and include additional information as needed to complete a picture of your personal cultural experience. In what way has the information discussed in the first section carried forward to influence your personal cultural experience? What specific values were held by your family of origin and community (e.g. religion, education, work, food, or family)? How were your family values similar to and different from those of the rest of the community? What types of rituals or ceremonies were important to your family? What types of personalities and communication can you identify? How was conflict handled? What views were held about diversity? How did diversity issues of gender, nationality, race, sexuality, disability, or religion impact your family? How has “privilege,” or the lack of it, eased life or made it more difficult for your family? Did the family move to different locations or remain in the same community throughout your development? Under what circumstances did moving occur? How did living in different communities influence your cultural experience? How is your current “family” culture similar to or different from your family of origin? How has change in the social and cultural nature of society at large influenced your cultural experience?

Cultural heritage identified vs DNA Analysis: In this section address you will address information in two parts: **1)** Address information you are able to obtain about your ancestors passed on by word of mouth or family documents. (Note that I am NOT asking for a genealogy here, although you may use that to provide structure for presenting your information). Questions to be considered are as follows; What nationalities are you able to identify? What type of work was done? What forms of artistic expression were important? Were there specific values you can identify (e.g. religion, education, work, food, or family)? Were traditional rites or ceremonies important to your ancestors? What types of personalities and communication styles can you identify? What views were held about diversity? In what ways were your ancestors impacted by diversity--gender, nationality, race, or religion? Were they native to this country or immigrants from another country? Under what circumstances did immigration occur? Did the family live in a community in this country with

the same nationality (e.g. German community)? How did acculturation occur? How was the native language treated by the family? Did the family move to different locations or remain in the same community across generations? Under what circumstances did moving occur? How did the social and cultural nature of society at the time influence your ancestors?

2) Address information from your DNA results. Identify areas of the DNA results that seem to support the information obtained from ancestors. Identify areas that might challenge this information. Identify the most surprising results. Identify what areas that may clarify inherit ideas of who you are that you might have had. What Ethnicity are you drawn to the most and will you most likely research going forward? What ideas, theories and concepts presented in your textbook now apply to you?

Becoming a sensitive multicultural counselor: Use this section to examine your personal cultural experience within the context of becoming a sensitive and competent multicultural counselor.

Respond to each of the following questions and include additional information as needed.

-How has your decision to become a counselor influenced your views toward cultural diversity?

-How would you describe your cultural identity development at the current time using information from your text and the DNA results?

-How will your communication values and skills impact your role as a competent multicultural counselor?

-Considering the nature of your cultural experience, describe five strengths you will bring to multicultural counseling.

-Within the same context, describe five weaknesses you currently have which could prevent you from being a sensitive multicultural counselor.

-Describe five attitudinal and five knowledge goals for yourself that, if met, would help you develop as a competent multicultural counselor.

NOTE: I recognize that some of you may find information requested in this paper to be sensitive in nature. Therefore, the paper will be kept confidential and will be read only by myself. It is assumed that information believed to be private to the family will not be included in the paper. While the DNA analysis is intended to enlighten you, the analysis information may not be well received by members of your family. So please use the information carefully.

If you have further privacy concerns, please feel free to discuss them with me.

Exams. There will be a total of 5 exams
