

MATH 3309: Survey of Basic Mathematical Theory II

Sul Ross State University Rio Grande College

Spring 2020

Professor: Michael Ortiz, Ph.D.

E-mail: mortiz4@sulross.edu

Office: Uvalde Campus A101

Telephone: (830) 279-3048

Course Description MTH 3308 is intended as an introduction to numeration systems, foundations of arithmetic, fractions and decimal numbers, measurement concepts, and problem solving.

TEKS Information on the Texas Essential Knowledge and Skills can be found on the TEA website: <http://www.tea.state.tx.us>

Class Time Tuesday, 6:00 – 8:45 p.m.

Class Location Eagle Pass D110

Required Text Long, DeTemple, & Millman, *Mathematical Reasoning for Elementary Teachers*, Seventh Edition, ISBN 0321900995

Office Hours M 11:00 – 2:00, T 3:30 – 4:30 (EP), W 11:00 – 2:00, Th 12:00 – 2:00

Course Policies

Attendance Policy

Attendance is mandatory. **You may be dropped from the course if you accumulate nine absences**, in accordance with University policy. One class period amounts to three absences. Arriving in class late or leaving early may be counted as an absence. It is your responsibility to notify me if you will be absent for any reason.

You will be held responsible for all material covered in class or the assigned text. If you have to miss a class, it is your responsibility to obtain all notes, assignments, and announcements from someone else in the class. Make-up exams will be given only in the event of an emergency, in which case written justification and/or documentation must be provided and approved.

Communication

I will post course documents, reminders, and announcements on the Blackboard system. I may also occasionally send announcements via e-mail. You should make sure you know how to access and use these tools. E-mail is the best way to contact me.

You are welcome to stop by my office if you wish to speak about the content or your progress in the course. **I am here to help you.** Ask questions in class, call me, e-mail me, or come to my office. If you don't communicate with me, then I can't help you.

Grading Policy

Your grades will be weighted as follows:

Participation	10%
Exam 1	25%
Exam 2	25%
Final Exam	40%

A student who averages at least 90% will receive an A; at least 80% will receive at least a B; at least 70% will receive at least a C; at least 60% will receive at least a D.

Participation

Your participation grade will be assigned depending on your class attendance and participation in class activities. Simply put, if you always come to class, seem like you're trying to pay attention and take notes, and take part in class activities, then you will get full credit.

Homework

Homework will be assigned for each section that we cover in the text. Although the homework will not be collected and graded for correctness, you should regard it as the most essential component of the course. It is very important that you complete each homework assignment before the next class period. This will allow you to make the most of our time together. **If you have a question, ask about it.** If you don't understand the homework, you are not ready to take the exam.

In order to achieve success in this course, you must work all the homework assignments in a timely manner!!! The amount of work for any college class is generally calculated as 3 hours of outside work for each hour in the classroom. **Budget your time accordingly.**

We will always have time to discuss the homework in class, and we may also work on problems together in groups. You should come to class prepared: make sure to have your textbook and suitable writing materials with you.

On the day of the final exam you will turn in a homework folder or notebook. This should contain every assigned homework **in order**, with **all the work shown**. Solutions with just the answers will not receive credit. These will be graded for completeness only.

Exams

There will be two midterm exams. The tentative dates are

Exam 1	February 25
Exam 2	March 17

This schedule is subject to change. You will be notified of a change at least one week in advance. Make-up exams will be given **only in the event of an emergency**, in which case written justification and/or documentation must be provided and approved.

The final exam is scheduled for Tuesday, May 5, from 6:00 – 8:45 p.m. The final exam will be comprehensive.

Subject Outline

Below is a tentative outline of the subjects we will cover in this course. Next to each topic section is the corresponding section from the textbook. As time allows, we will also make excursions into the practical aspects of math education in a region with limited access to educational resources.

I. Rational numbers and real numbers

1. Fractions (§6.1): *basic concepts – representations and manipulatives – equivalent fractions – fractions in simplest form – common denominators – ordering*
2. Addition and subtraction of fractions (§6.2): *addition of fractions – addition with manipulatives – proper fractions and mixed numbers – subtraction of fractions – subtraction with manipulatives*
3. Multiplication and division of fractions (§6.3): *multiplication of fractions – multiplication as an operator – the area model – division of fractions – division with pictures – the invert-and-multiply rule*
4. Rational numbers (§§6.1,4): *the rational number system – properties of arithmetic – the density property – applications*
5. Decimals and real numbers (§§7.1 – 2): *the decimal system – powers of ten – terminating decimals and fractions – repeating decimals and fractions – irrational numbers and real numbers – the number line – arithmetic with decimals*
6. Ratios, proportions, and percents (§§7.3 – 4): *ratios – proportions – proportional reasoning – percents*

II. Statistics

1. Organizing and representing data (§13.1): *dot plots – stem-and-leaf plots – histograms – line graphs – bar graphs – pie charts – pictographs – cautions*
2. Measuring the center and variation of data (§13.2): *the mean – the median – the mode – upper and lower quartiles – outliers – box plots – the standard deviation*
3. Statistical inference (§13.3): *the role of statistical inference – biased studies and random samples – estimating the mean and standard deviation of a population – distributions – z-scores and percentiles*

III. Probability (Chapter 14)

1. The basics of probability (§14.1): *basic terminology – experimental probability – theoretical probability – the addition principle – complementary events*
2. Principles of counting (§14.2): *the addition principle – permutations – the multiplication principle – conditional probability – compound events – independent events*
3. Permutations and combinations (§14.3): *permutation vs. combination – notation – formulas – Pascal's identity – applications*

4. Odds and expected value (§14.4): *odds – expected value*

Schedule

This schedule is tentative only. The unit numbers refer to the above outline.

Unit I	January 14 – February 18
Exam 1	February 25
Unit II	February 25 – March 3
<i>Spring Break</i>	<i>March 9 – 13</i>
Exam 2	March 17
Unit III	March 17 – April 28
Final Exam	May 5

University Statements

Distance Education Statement: *Students enrolled in distance education courses have equal access to the university's academic support services, such as Smarthinking, library resources, online databases, and instructional technology support. For more information about accessing these resources, visit the SRSU website. Students should correspond using Sul Ross email accounts and submit online assignments through Blackboard, which requires secure login information to verify students' identities and to protect students' information. The procedures for filing a student complaint are included in the student handbook. Students enrolled in distance education courses at Sul Ross are expected to adhere to all policies pertaining to academic honesty and appropriate student conduct, as described in the student handbook. Students in web-based courses must maintain appropriate equipment and software, according to the needs and requirements of the course, as outlined on the SRSU website.*

Americans with Disabilities Act: *Sul Ross State University is committed to equal access in compliance with the Americans with Disabilities Act of 1973. It is the student's responsibility to initiate a request for accessibility services. Students seeking accessibility services must contact Kathy Biddick in Student Services, Room C-102, Uvalde campus. The mailing address is 2623 Garner Field Road, Rio Grande College-Sul Ross State University, Uvalde, Texas 78801. Telephone: 830-279-3003. Email: kbiddick@sulross.edu.*
