

**Math 1316 Syllabus  
Plane Trigonometry  
Spring 2022 Sul Ross State University**

<b>Secs. 001, ALP:</b>	Mon, Wed: 2–3:15p in ACR 204
<b>Instructor:</b>	Dr. Kris Jorgenson
<b>Office:</b>	ACR 109D
<b>E-mail:</b>	kjorgenson@sulross.edu
<b>Office Hours:</b>	Mon, Tue, Wed, Thu, Fri: 10-11a; Wed, Thu: 3:30-5p; Fri: 3-5p; also by appointment

**Course Description:** The prerequisite is Math 1314 or equivalent (College Algebra). The course will cover the topics of directed angular measure, definitions and evaluation of trigonometric functions, graphs of trig functions, the inverse trig functions, trigonometric identities and conditional equations, and applications of trigonometry laws for solving triangles to real-world problems, areas, algebraic and geometric vectors and their applications.

**Student Learning Objectives:** Successful students will demonstrate correct understanding and knowledge of the topics of algebra and trigonometry including but not limited to those listed in the previous paragraph through use of correct terminology and problem-solving techniques. Students will apply knowledge of concepts and problem-solving methods to different problem-solving situations. Students will demonstrate correct knowledge of the difference between numbers that are in exact form and numbers that are approximate and will be able to report numbers in exact form and with a correct approximation when required. Such numbers are often in the context of other mathematical objects such as a function or algebraic expression. Students will express their solutions clearly in writing and complete sentences when appropriate.

**Required Materials:** Textbook: Trigonometry, A Unit Circle Approach, 9th edition by Michael Sullivan, ISBN: 0321716574, the subject matter of Chaps. 1-5 with some extra material in aid of these topics. There should be a copy of this textbook on reserve in the library.

Scientific Calculator: There will be some need of a scientific calculator though calculators may be used to check arithmetic calculations throughout the semester. A scientific calculator contains buttons with the denotations such as  $y^x$ ,  $a^b$ ,  $e^x$ , SIN, COS, TAN, but use of a calculator will not be a large part of this course. Appropriate scientific calculators cost usually \$10-\$50 each. Symbolic graphing calculators, such as the TI-89 or TI-92, will not be allowed. Non-symbolic, menu-driven graphing calculators, such as the TI-84, may be used. Please check with me about this at the beginning of the semester. Only stand-alone (not contained within a cell-phone or computer) calculators will be allowed on in-class quizzes and tests.

## **Pandemic Restrictions**

It is strongly encouraged that students get a vaccination and a booster and wear a proper face covering in class and observe social distancing. "Proper face covering" does not include a mask with an air valve or a single-layer, cloth handkerchief. Cloth handkerchiefs can be used if they are folded to create a double-layer (or more) or have another mitigating layer such as a coffee filter inserted underneath. "Social distancing" means a 6-foot (or more) distance between people with proper face coverings.

**Class Materials:** Students are expected to be prepared in every class with pencils and paper to take notes and get involved in in-class assignments. This will be part of your grade. You should also have access to Blackboard and have an e-mail address that you check regularly be your e-address registered in Bb since I will need to contact you outside of class with important information.

**Grading:** Your total grade will break down as follows:

**Daily Grade (DG)** worth **30%**

**Test Average (TA)** worth **60%** will be based on 4 in-class tests.

**Individual Project Problem** is worth **10%** of your final grade

The **DG** will consist of **Homework (HW)**, **Class Study Grades (CSG)** and **Quiz** grades, which will each count for **10%** of your grade. On days when there is no in-class quiz or test students will receive a Class Study Grade (CSG) based on attendance and class participation. Unit assignments will be handed out at the beginning of each unit of study. Quizzes and tests will be based on these unit homework assignments. Students need to keep a homework notebook, which can be used during most in-class quizzes (with exceptions), but not in-class tests. Many homework problems will be done as in-class exercises. When you hand in a HW assignment **NO BLANK PAPER SHOULD BE SUBMITTED.**

There will be 4 in-class tests given during the term. Each test will be a unit test covering the assignments of that unit. The dates for these tests are as follows.

<b>Test 1</b>	<b>Wed, Feb. 9</b>
<b>Test 2</b>	<b>Wed, March 16</b>
<b>Test 3</b>	<b>Mon, April 11</b>
<b>Test 4</b>	<b>Tue, May 3, 3-5 pm</b>

Test 4 will be given during finals week during the allotted 2-hour period.

Each of the 4 tests will count in the Test Average. I will allow 1 page of prepared notes (that you create) to be used on Tests 1, 3, and, 4, but no notes allowed on Test 2. This page of notes will be handed in with your test. On Test 3, I will also include 1 additional page of formulas with the test. Scientific calculators will be allowed during the tests except for most of Test 2; though you will be allowed the use of your calculator on one section of Test 2. Calculators will not be allowed on any quizzes (prior to Test 2) that involve inverse trig functions.

The **Individual Project Problem (IPP)** will be an application problem over a topic covered in one of the units of study and will be different for each student and must be approved by me. I will have some suggested problems for this, but a student may pick a problem of interest from the textbook as long as it has my approval. Each student's IPP must be chosen and approved by me by Friday April 15 at the latest.

**Late Work, Rescheduled Quizzes/Tests** Deadlines will be stated for each homework grade. There is usually some flexibility, but often homework handed in late is for half credit. To take an in-class quiz or test at a time other than the scheduled time, you must notify me of this absence on or before the day missed, and satisfy one of two requirements: either (1) a written medical excuse signed by a medical professional is supplied for the day of the absence, or (2) if your excuse is for a university activity, you must notify me about this authorized absence in writing with your name, the name of your organization and the date(s) of your absence (sending me an e-mail is a good way to do this), and your name must appear on a published explained absence list that I am provided (or the university activity is verified by a faculty sponsor). Also, you and I must set up a time for you to make up the quiz or test within a reasonable time period (not more than 2 or 3 days) before or after the time of the missed grade. Usually I will let you make up a grade according to the above conditions if it is due to another one-time occurrence, such as the care of someone else in your family or a friend, or a work-related excuse as long as you can document your absence and you let me know **BY THE DAY OF THE ABSENCE AT THE LATEST**. A CSG may also be made up with me in my office if you follow the above policy.

**Attendance** I will be taking attendance as university policy precludes you from missing 3 weeks or more for anything other than authorized university activities. To excuse an absence for a university activity, in addition to letting me know of the absence by the day of the absence (as explained previously) you must also spend at least 60 minutes outside of class on this course with me or with a tutor, but they will need to sign a note that documents this made-up time. Also I will allow you to excuse a test day for a documented medical absence as long as you also make up the test with me or in the testing center. If you have 3 weeks or more of unexcused absences, I reserve the right to drop you from this class with a grade of 'F', which is university policy.

**Good Advice** Concentrate on learning the material of the course rather than worrying about your grade. Your time is best spent concentrating on the material to be learned in the impending assignments, asking questions, and devoting yourself to activities that will help you learn the material and do better in the course. I will worry about the details of your grade since you doing so does not help you earn a higher grade. But learning the material and doing well on the tests *will* help your grade. **Remember that math is not a spectator sport**, so the more problems you work yourself, the more

practice you will get, and the more confident you will be, and you will do better in this course. Working on the problems helps you to figure out what your specific questions are. Remember an individual homework or quiz grade may not count for a lot in your overall grade, but working and learning from the homework and quizzes is **essential** because this is where you learn the topics that will appear on the tests, which do count for a lot of your grade. The best lessons learned often come from correcting a quiz or homework problem in which you have made a mistake.

### **More Good Advice**

Keep absences to a minimum. You never know when you might miss something important either from the lecture or class discussion such as questions other students ask. Remember: **YOU ARE RESPONSIBLE FOR EVERYTHING THAT IS DISCUSSED DURING CLASS WHETHER YOU ARE PRESENT OR NOT.**

Also do not allow yourself to develop bad habits such as missing classes. It's human nature to be controlled by our habits, so once you develop a weekly habit for the semester, it can be hard to break this habit. So be sure that you allow the necessary time for this course **FROM THE BEGINNING OF THE TERM, ESPECIALLY** if you consider mathematics to not be your best subject. If you have trouble in math, then you should attend **EVERY** class of a college mathematics course. Not showing up to class or not doing the required work will not cause this class to magically go away. If you are not understanding the material and/or have fallen behind in your work, missing class will not help. **IF YOU FALL BEHIND, PLEASE DO NOT DROP THIS COURSE WITHOUT TALKING TO ME FIRST.** Making mistakes or falling behind is natural, so it is best to talk to me about this. If you do have to miss class, let me know beforehand. Discuss with me what you are not understanding. It is essential to get your questions answered. But meeting with me outside of class is not a substitute for attending class.

Ask questions no matter how easy or trivial they may seem. There is no such thing as a bad or silly question. Questions result when you are interested and have been thinking about areas, such as mathematics, in which you have limitations in your educational background. Being in a college mathematics course means you will have questions both obvious and more subtle. Asking questions is a very important part of learning.

Study and work problems regularly—every day or every other day. Work on assignments discussed in class as soon as you can after class while the methods discussed are still fresh in mind. You can't expect to succeed in a math course by waiting till the last minute to only study and cram prior to a test. If you promise yourself you will study for a ½-hour, get into the work, forget the clock, then the next thing you know, you've studied and worked for one to two hours. Remember that

**LEARNING FROM MISTAKES + PERSISTENCE = SUCCESS!**

**Classroom Conduct** It is important to conduct yourself in a college classroom so that everyone can benefit from good communication between instructor and students. My goal is to create an environment in which everyone can do their best work, learn, and

make the best grades possible.

I think you will find that I am a very friendly, sympathetic, and generous instructor as long as you are sincerely working to succeed in this course and certain guidelines for classroom behavior are followed to allow a sanctity of study for your fellow students. Habits such as holding conversations during class, or being engaged in activities not related to this course such as working on a different course or reading your cell-phone will work against the goals of this course and cause you to be counted absent and you will lose Daily Grade credit. Also engaging with electronic communication devices of any kind during class or coming into class more than 5 minutes late or leaving early before class is dismissed circumvent the goals of this course and cause you to lose credit. My sympathy and generosity will quickly evaporate if I find that you are working against the goals of the course or that you are simply trying to get a good grade without learning or without honestly doing the required work. I want you to have every opportunity to learn and succeed in this course.

Please be aware of the rules for Academic Honesty that you will find in the Sul Ross Student Handbook. Use commonsense to think of anything else that will allow you to learn and do the best work that you can in this class, and for me to better help you do your best work. Remember that being registered for this course does not allow you to behave in any manner you wish during class. You must keep other people in mind. It is within university policy for me to send a student out of this class on a temporary or permanent basis if disruptions or interruptions like the types listed above persist.

**SRSU Alpine Disability Services.** Sul Ross State University (SRSU) is committed to equal access in compliance with Americans with Disabilities Act of 1973. It is SRSU policy to provide reasonable accommodations to students with documented disabilities. It is the student's responsibility to initiate a request each semester for each class. Alpine students seeking accessibility/accommodations services must contact Mary Schwartze Grisham, M.Ed., LPC, SRSU's Accessibility Services Coordinator at 432-837-8203 (please leave a message and we'll get back to you as soon as we can during working hours), or email [mschwartz@sulross.edu](mailto:mschwartz@sulross.edu) . Our office is located on the first floor of Ferguson Hall (Suite 112), and our mailing address is P.O. Box C-122, Sul Ross State University, Alpine. Texas, 79832.

This course is supportive of the Student Learning Outcomes for the Bachelor of Science degree in Mathematics:

- 1) The student will be able to demonstrate content knowledge of basic mathematical principles.
- 2) The student will be proficient in logic, able to negate statements, provide counterexamples to false statements, and determine the validity of arguments.
- 3) The student will be able to communicate mathematical content clearly and with valid reasoning.

### **Program Marketable Skills:**

Marketable Skill (MS) 1: Students Demonstrate Logical and Analytical Skills.

MS 2: Students Demonstrate Problem-Solving Using Analytic and Algebraic Methods.

MS 3: Students Use Technology in Problem-Solving and Presentation.

MS 4: Students Use Communication and Pedagogical Skills.

### **For Core Curriculum Courses Only for 2021-2022.**

- **Critical Thinking.** Students will develop critical thinking skills to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
- **Empirical & Quantitative Skills.** Students will develop empirical and quantitative skills to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusion.

### **Classroom Climate of Respect**

Importantly, this class will foster free expression, critical investigation, and the open discussion of ideas. This means that all of us must help create and sustain an atmosphere of tolerance, civility, and respect for the viewpoints of others. Similarly, we must all learn how to probe, oppose and disagree without resorting to tactics of intimidation, harassment, or personal attack. No one is entitled to harass, belittle, or discriminate against another on the basis of race, religion, ethnicity, age, gender, national origin, or sexual preference. Still we will not be silenced by the difficulty of fruitfully discussing politically sensitive issues.

### **Diversity Statement**

"I aim to create a learning environment for my students that supports a diversity of thoughts, perspectives and experiences, and honors your identities (including race, gender, class, sexuality, religion, ability, socioeconomic class, age, nationality, etc.). I also understand that the crisis of COVID, economic disparity, and health concerns, or even unexpected life events could impact the conditions necessary for you to succeed. My commitment is to be there for you and help you meet the learning objectives of this course. I do this to demonstrate my commitment to you and to the mission of Sul Ross State University to create an inclusive environment and care for the whole student as part of the Sul Ross Familia. If you feel like your performance in the class is being impacted by your experiences outside of class, please don't hesitate to come and talk with me. I want to be a resource for you."

### Important Dates

Mon, Jan. 10	First day of classes, first day of late registration
	and schedule changes
Thu, Jan. 13	Last day for late registration and schedule changes
Mon, Jan. 17	Martin Luther King, Jr. Holiday, No Classes
Wed, Jan. 26	Last Day to Drop a Class with No Academic Record,
	12th class day
Mon.-Fri. March 7-11	Spring Break Holidays, No Classes
Mon, March 28	Last day to drop a class with a grade of "W"
	by 4 pm in University Registrar's Office
Fri, April 15	Good Friday Holiday, No Classes
Wed, April 27	Last Day of Class before Finals
Thu, April 28	Dead Day, No Classes
Fri, Mon-Wed: April 29, May 2-4	Final Exams, End of Term

<b>Tentative Class Schedule-Math 1316, Spring 2022</b>		
<b>X = no class</b>	Mon	Wed
Jan. 10, 12	Distance, Midpoints Circles	Angle Measures Radians, Degrees
Jan. 19	<b>X - MLK Day Holiday</b>	Arc Lengths Wheel Rotation
Jan. 24, 26	Arc Lengths Area of Sector	Triangle Angles Functions
Jan. 31, Feb. 2	Triangle Trig Defns Coterminal Angles	General Trig Definitions Point Angles
Feb. 7, 9	Review for Test 1	<b>Test 1</b>
Feb. 14, 16	Even/Odd Functions Graphs Sine, Cosine Domain, Range, Periods	Pythagorean Identities Fundamental Identities
Feb. 21, 23	Graphs Tan, Cot, Sec, Csc Domain, Range, Periods of tan, cot, sec, csc	Inverse Functions Inverse Trig Functions
Feb. 28, Mar. 2	Inverse Trig Functions Inverse Trig Evaluations Equations	Equations Right Triangle Applications
<b>March 7-11 Spring Break Holiday, X - No Classes -----&gt;</b>		
March. 14, 16	Test 2 Review	<b>Test 2</b>
March. 21, 23	Angle Sum Difference Double Angle Formulas	Half Angle Identities Cofunction Identities
March. 28, 30	Law of Sines	Law of Sines, Cosines
April. 4, 6	Law of Cosines Areas	Test 3 Review
April. 11, 13	<b>Test 3</b>	Polar Coordinates, Graphs
April. 18, 20	Polar Graphs, Polar Forms Complex Nos	Polar Forms Comp. Nos
April. 25, 27	Geometric Vectors Applications	Geometric Vectors Dot Products, Applications
Tue., May 3	<b>Tue., May 3, Test 4 (Final Exam) Test 4: 3-5p</b>
