### **Our duty to each other:**

The atmosphere in our classroom requires that we are each accountable for what we say and what we do. Please conduct yourself in a manner that demonstrates your observance of the Golden Rule. The University should be a place where we exchange ideas and points of view on a variety of issues. We should all feel comfortable and safe by trusting our atmosphere in order to express our point of view with clarity, precision, and measured language. \*With the advent of email, the communication between teacher and student is better served. I will respond to your communication(s); I expect for you to respond to mine.

### **No Electronic Devices:**

Our classroom will resemble a Seminar. Our subject matter is complicated, our reading is dense, our discussions will be lively (and stimulating); thus, it is necessary to omit the trappings (and distractions) of electronic devices during our meetings.

There is ***no required textbook*** for this course (mostly all readings are part of the public domain; you will be furnished with some readings that are not easy to locate online).

Philosophy is the mother of all discipline. Essentially, doing work in Philosophy is necessary to develop critical thinking skills and critical writing skills. I will attempt to define philosophy in as many ways possible. Our initial working definition for Philosophy is: the human activity of examining questions for which there are no acceptable answers.

It is my belief that “words” make a difference. You’ve been doing Philosophy all of your lives; thus, you may want to invest time in getting to know “words” that are utilized in expressing ideas. Doing this will help you read purposefully. You want to acclimate yourself to reading with the idea that you will improve reading comprehension. Changing your reading habits will enable you: to think critically, examine your ideology, write better, ask interesting questions, and grow as a human being. Thinking, feeling, and engaging in discussion is what human beings *can* do to improve the world. Marx famously claimed that the task of the philosopher is “not to interpret the world but to change it.”
