HISTORY OF THE UNITED STATES Since 1877

Course Description: HIST 1302 is a general introductory survey of the second half of United States history from 1877 (the inauguration of Rutherford B. Hayes and the end of reconstruction) up to the present day. This course explores modern US history and concentrates on the social, economic, and political developments from Reconstruction to the late 1990s. The course will examine how individuals and organized groups sought to reform public policy and social conditions according to deeply held moral values and political commitments.

We will focus on the people of the United States—their responses to modern life in the Industrial Era and post-Industrial Era and the transformations they engendered in both domestic policies and international affairs. Much of the course content will also focus on the significance of gender, race, ethnicity, and class in the development of American identity, culture, and institutions. We will explore how these groups worked to expand the nation’s notions of freedom and democracy as well as how individuals responded to increasing cultural diversity and technological innovations.
