

ANSC 1419
Introduction to Animal Science
Fall 2024

Instructor: Dr. Jamie Boyd
Office: RAS 103A
E-mail: jamie.boyd@sulross.edu
Phone: (432) 837-8413

Office Hours: MW 8:15-10:30
Friday 9:00-12 or by appointment

Lecture: Section 001 MW 11:00 – 12:15 RAS 130

Lab: Section L03 M 1:00-2:40 pm RAS 137
Section L01 T 1:00-2:40 pm RAS 137

Course Description: An overview of the basic principles and practices of animal agriculture as well as discussion of current topics and future trends.

Text: *Fundamentals of Animal Science* Scanes 2011 Delmar Publishing. This text is **not required**.

Purpose of the Course: This course is designed to provide an overview of traditional and non-conventional forms of animal agriculture as well as current problems facing the livestock industry. The laboratory sessions are designed to provide “hands-on” application of principles, as much as possible. Therefore, specific clothing requirements will be made for some of these laboratory periods for your safety. Labs may include dissections.

Student Learning Outcomes: Students will acquire a basic foundation of animal production principles and concepts. The laboratory sessions will provide opportunities to gain insight and expertise in the application of concepts presented in lecture.

(ANSC) Student Learning Outcomes:

Student will be able to:

1. Demonstrate the basic skills of interpreting research data gathered in an agricultural context,
2. Apply critical thinking skills to mitigate potential challenges in diverse animal sciences and related agricultural industries,
3. Develop problem solving skills, and
4. Demonstrate the ability to communicate through written, spoken, and graphical methods.

Assessment Measures: At the end of this course you should have a basic understanding of the concepts and principles of animal agriculture. Through laboratory sessions and field trips you will gain experience and an appreciation for animal handling techniques and application of principles. Your success of achieving these results will be based on a minimal of 60% or better on all exams, quizzes and other assignments.

Methods of Instruction: This course consists of lecture sessions to provide the basic concepts related to animal science. Supplemental information provided on a PowerPoint format will be available for downloading from Blackboard. Laboratory sessions are designed to provide application of these concepts and maximize “hands-on” experiences.

Attendance Policy: It is your responsibility to attend lecture and laboratory periods. **I do not provide copies of missed lecture material. It is also not feasible to “make-up” laboratory sessions.** There will be no make-up exams or quizzes without **prior** approval.

Recommendations for Success: In order to succeed in this class, I recommend that you dedicate at a minimum two hours of study time per class hour each week. The material covered in this course cannot be learned adequately in only a couple

days, it is cumulative and each day's material will build on the previous day. **The use of cell phones in class is prohibited!**

Accommodations:

It is the SRSU policy to provide reasonable accommodations to students with disabilities. If you would like to seek any accommodations for this course, please contact the Counseling and Accessibility Services Office: Ferguson Hall 112 phone: (432) 837-8203 as soon as possible to ensure that such accommodations are implemented in a timely fashion.

Academic Integrity: Keep in mind that your integrity and reputation is among the few characteristics that you solely control. It takes consistent effort to build and maintain a good reputation, but very little to destroy it. Some aspects of academic integrity such as cheating are easy to understand. In this class, cheating will result in a score of 0 points on that quiz or exam. Should a repeat of the event occur, steps will be taken to have that person dropped from the class and receive a failing grade for the course.

In other cases, such as group projects the lines of integrity may seem blurred. If you ever have a question about what is, or what is not acceptable, ask the instructor.

Special Requirements: As indicated previously, many of the laboratory sessions are designed to provide as much "hands-on" experience as possible. Therefore, specific clothing requirements will be made for some of these laboratory periods for your safety. You will not be able to participate if these requirements are not followed. Collect 10 bonus points, by sending me an email with your name and phrase extra credit in the subject line by the first of September.

Examination and Grading: The grade you earn is your responsibility! There will be no "extra-credit" opportunities.

Exams and Quizzes: There will be no make-up exams or quizzes without prior approval. You must talk to me "live". Voice or e-mail messages are not considered valid excuses.

Examinations: With exception of multiple-choice or fill-in-the-blank questions, all answers must be written in complete sentences.

Weekly Quizzes: You will be responsible for the material provided during the previous three lectures and laboratory sessions. With exception of multiple-choice or fill-in-the-blank questions, all answers must be written in complete sentences.

Points Available:

3- One hour exams (100pts)	=	300
10-Weekly quizzes (10pts)	=	100
Lab Attendance/Assignments	=	150
Lab Practicum	=	100
*unannounced quizzes	=	?
Comprehensive final (100pts)	=	150
Total	=	800

* I reserve the right to give an unannounced quiz in a lecture or laboratory session at any time during the semester.

Grading Scale:

- A = > 90%
- B = 80-89%
- C = 70-79%
- D = 60-69%
- F = < 60%

Schedule of Class Sessions: This information should be treated as an outline. There may be some alterations to the sequence of topics.

***Weekly Quizzes will be every Friday unless noted**

<u>Date</u>	<u>Lecture</u>	<u>Chapter</u>	<u>Laboratory</u>
Aug. 26-28	Introduction/Products Domestication	23, 25, 26 2	No labs this week!
Sept 2 4*	Labor Day (no class) Nutrition/Digestion	13-14	No labs this week!
9-11*	Nutrition/Digestion		Tour/ Training
16-18*	Repro Physiology Review	16	Digestive Physiology
23 25	Exam I (23rd) Genetics	9	Sheep and Goats
30 Oct 2*	Genetics		Sheep and Goats
7-9*	Beef	7	Repro Physiology
14-16	Exam II (16th)		DNA
21-23	Poultry	11	Feeds/Feeding
28-30*	Equine	5	Feeds/Feeding
Nov 4-6*	Dairy Swine	7 8	Equine
11-13*	Food Safety	24	Equine
18 20	No Class- Lab will be held Exam III (20th)		Lab Practicum
25*-27	Food Safety Thanksgiving Holiday! (27 th)		No labs!
Dec 2-4*	Wrap-up and review		No labs!

Final comprehensive exam TBA
