SUL ROSS STATE UNIVERSITY COURSE DESCRIPTION

The structural essentials of English, with some treatment of the historical development of the language, from Anglo-Saxon to modern English.

Instructor's Course Description

There are two goals of the course. Exploring the history of English will show us how the language has changed and continues to change. Languages change through contact with other languages. They change due to influence from within as well as from without. Languages are dynamic and multi-faceted. There is not one true, correct English from which we can prescribe ideal rules. The word "language" and the word "English" are both problematic terms. There are many dialects of English and therefore many Englishes. Some forms of speech may be more appropriate in certain contexts--and academic and written varieties of a language tend to be prescribed and formulaic--but no variety is essentially better than any other. Studying the history of English will reveal how the language has gone through many versions while being diverse in its varieties or dialects. To grasp the fundamental concepts of linguistics we will read and do exercises from *Language Files*. We will also read works from Old and Middle English in order to savor the history of the language. In this way we will be reading the history of English at the same time will are informing ourselves on how language works.

In addition to covering the influences which changed the language, this course also covers the underlying structure of the language. It is the structure of language in general--universal grammar in Chomsky's terms--which makes change, variation, and creativity possible. The descriptive study of samples of language helps to show the underlying biological underpinnings of language, which are structurally patterned, our biological predisposition. Structure--in sounds, words, and sentences--explains creativity in language. From a few structural patterns, there is infinite variety in what we can say. Because of structure, most of what we say every day is absolutely original and was never said or heard before. To master the structural aspects of the language, I chose *Language Files,* 13th edition, produced by the Ohio State University's Department of Linguistics. The textbook provides readable explanations of linguistic patterns which are followed up by "practice" exercises that use the empirical method of descriptive linguistics. We will cover the first five sections of the book: the introduction, phonetics, phonology, morphology and syntax.

What's most important is your research and discovery of ideas. This is a holistic introduction to linguistics. Although we will only cover the early history of English and the formal study of phonology, morphology, syntax, and semantics, you can compose a research paper in any subfield of linguistics, including historical; indigenous languages and language extinction; first language acquisition; second language acquisition; psycho- and neurolinguistics; sociolinguistics; writing systems; animal communication; AI and computational linguistics. My own first graduate level linguistics paper was in the field of sociolinguistics. I was interested in the author Nikos Kazantzakis and I knew that he wrote in the demotic or common language rather than prescribed "classical" Greek. I wrote a research paper on Kazantzakis and diglossia in Greece. You will have to write one research paper on a subject in linguistics of your own choice.

Course Student Learning Objectives (SLOs):
The student will be able to...
1. Understand the formal aspects of language: syntax, morphology, and phonology in English.
2. Understand language shift in sound, grammar, and meaning.
3. Understand language change in English in terms of cultural contact, globalization, and diversity.
4. Practice basic corpus analysis in order to develop a descriptive understanding of language.
5. Acquire a basic theoretical vocabulary for linguistics and English grammar.

English Program Learning Objectives:
Graduating students will demonstrate that they can
1. Construct essays that demonstrate unity, organization, coherence, and development
2. Analyze literary works by applying principles of literary criticism or theory
3. Produce research papers that demonstrate the ability to locate a variety of acceptable sources, employ them effectively through quotations or paraphrases, integrate them smoothly into the writer's own prose, and document them correctly using MLA format
4. Demonstrate creativity or originality of thought in written or multimedia projects
5. Compare/contrast and analyze major works and periods within World, English, and American literature.

Marketable Skills
1. Students will communicate effectively in writing and speaking.
2. Students will use different research strategies to address problems and develop ideas that engage a variety of perspectives.
3. Students will recognize how social and cultural contexts shape meaning and language.

Projects
1. Blackboard Discussion posts on early English literature. (5 posts/150 points total)
2. Quizzes on Old and Middle English: midterm and final. (Each 50 points/100 total)
3. "Practice" exercises in Language Files. (5 @ 60 points each/300 total)
4. Term Paper (300 points total)
5. Statement of purpose for Term Paper and peer review (25 points each/50 points total)
6. Term Paper Power Point Presentation (100 points)

1. Blackboard Discussions (150 points; 30 points each post, 5 total)
These are essentially short response papers of 300 words in length. Identify a passage with a topic that interests you. Then interpret, elaborate, apply or question the ideas in the passage.

2. Quizzes on Old and Middle English Literature (100 total points/ Each quiz 50 points)
These will be small scale, low stakes quizzes with multiple choice questions. The goal of these quizzes is to get read and retain key terms and concepts. The literary readings will be accompanied by excerpts of literary criticism on the readings. The quizzes will cover both the critical essay and the literature.

3. "Practice" exercises in *Language Files* (300 points; 5 exercises at 60 points each)
These exercises come from the "practice" section at the end of each unit in the *Language Files*. I will try to limit the scale of the assignments.

4. Term Paper
300 points;
      25 points for statement of purpose
      25 points peer review
Please submit a statement of purpose and meet with me by Collaborate to discuss a term paper idea. Research in descriptive linguistics tends to be empirical. You can research either specific works of literature or topics in applied or theoretical linguistics.

GRADING
You can earn up to 1000 total possible points. The number of points needed to earn the following grades are: 900-1000=A, 800-899=B, 700-799=C, 600-699=D, 0-599=F.
