

Math 1342 Syllabus
Elementary Statistical Methods
Fall 2025 Sul Ross State University

Sec. 002:	Mon, Wed: 11a–12:15p in ACR 204
Instructor:	Dr. Kris Jorgenson
Office:	ACR 109D
E-mail:	kjorgenson@sulross.edu
Office Hours:	Mon, Tue, Wed: 10-11a; Thu, Fri: 10a-12p;
	Wed, Thu, Fri: 3:30-4:30p; also by appointment

Course Description: This is an introductory statistics course designed for the student to develop critical thinking skills necessary to interpret statistical information. In this course, the student will prepare for further statistical work in his/her field. Topics include: measures of central tendency, measures of variation, normal distributions, hypothesis testing, and graphical representations. Use of technology and real-world data is integrated throughout the course. Prerequisites: Completion of MATH 0301 or a satisfactory score on the Mathematics Placement Test.

Student Learning Objectives: Successful students will demonstrate correct understanding and knowledge of the topics including but not limited to those listed in the previous paragraph. Students will apply knowledge of concepts and problem-solving methods to new contexts and situations. Students will demonstrate correct knowledge of the difference between numbers that are in exact form and numbers that are approximate and will be able to report numbers in exact form and with a correct approximation when required. Students will express their solutions clearly in writing and by using complete sentences when appropriate.

This course is supportive of the
Student Learning Outcomes for the Bachelor of Science degree in Mathematics:

- 1) The student will be able to demonstrate content knowledge of basic mathematical principles.
- 2) The student will be proficient in logic, able to negate statements, provide counterexamples to false statements, and determine the validity of arguments.
- 3) The student will be able to communicate mathematical content clearly and with valid reasoning.

Necessary Materials: Textbook: Beginning Statistics 3rd Edition by Warren, Denley, and Atchley, Software and eBook only: ISBN: 978-1-64277-279-1 are required.

For Software + eBook + Textbook, ISBN: 978-1-64277-280-7. A hard copy of the textbook is optional. Your homework grade will be based primarily on online homework, which I denote as OHW (Online Homework) which will be delivered through the Hawkes online homework system.

Scientific Calculator: There will be some need of a scientific calculator, which has buttons with denotations such as y^x , a^b , or \wedge , e^x , LN, LOG. Only a stand-alone (not connected to a phone or computer) calculator may be used in the in-class quizzes and tests. Appropriate

scientific calculators cost usually \$10-\$50 each. Any graphing calculators (for example the TI-83, TI-84, TI-89 or TI-92) **are not allowed**.

Class Materials: Students are expected to be prepared in every class with writing implements and paper in some sort of organized notebook for taking notes of lecture content and examples, and for homework. You are required to be involved in class activities every class day. This will be part of your grade. Printed lecture notes will be provided on Blackboard Course Content as we cover these sections.

Blackboard: You are required to have access to Blackboard and have an e-mail address that you check regularly be your e-address registered in Bb since I will regularly need to contact you outside of class with important information through your Blackboard e-mail.

Grading and Assignments: The assignments discussed below will help students achieve all of the Learning Objectives mentioned previously through active learning and assessment. Your total grade will break down as follows:

Daily Grade (DG) is worth **30%** and consists of **Class Study Grades (CSG)** **10%** and **Online Homework (OHW)** **20%**. The **Test Average** worth **70%** will be based on 3 in-class tests.

There will be some grade given in every class period except the 1st day of class. A **Class Study Grade (CSG)** will be based on credit for attendance and involvement in in-class activities on days for which there is no in-class test or quiz. The **Online Homework (OHW)** will be done outside of class. You should collect the OHW in a **notebook** so that you get practice writing problems out by hand as you will for the in-class tests.

There will be **3 Unit Tests** each based on the corresponding Unit Assignments. Each of these tests will count in your **test average**. You may only use pencil(s)/eraser(s) and a scientific calculator during the tests in addition to 1 page of notes created before the test. The first 2 tests will be given during class time on the dates given below while Test 3 will be given during the allotted 2-hour final exam period. These test dates are as follows.

Test 1	Mon. Sept. 29
Test 2	Mon. Nov. 3
Test 3	Tue. Dec. 9, 10:15a-12:15p

I give letter grades according to the traditional 90%-100% for an A; 80-89% for a B; 70-79% for a C; 60-69% for a D; and less than 60% for an F; with some exceptions. Students whose total average is between 50-59% with Test Average over 50% will often be rounded up to a D but only if the student has completed every major assignment (no exceptions) while doing their own best work. Students working similarly with a borderline grade of 89%, 79%, or 69% will often be rounded up to the next grade-level as long as their test average is in line with this total average.

To Guarantee Full Credit for Work Done at a Time Different Than the Scheduled Time:

* For Tests or In-class Quizzes, be sure to contact me about the missed grade **before or by the day of the absence** and be able to produce documentation for a medical excuse or from a faculty sponsor for an absence due to a trip or activity with a Sul Ross student organization. You can send me these documents by e-mail or in-person. Be sure to make an appointment with me to make up the quiz or test in my office area no more than 2-3 days

before or after the absence.

* For a Class Study Grade, if you document your absence as explained in the previous paragraph, you can make up the CSG in my office area before the day of the next test.

* For Online Homework, the OHW deadlines are a guide to help you keep up with these online assignments, but you can still earn full credit on an OHW assignment as long as you complete it before the corresponding impending test.

Attendance I will be taking attendance as university policy precludes you from missing 3 weeks or more for anything other than authorized university activities. To excuse an absence for a university activity, in addition to letting me know of the absence by the day of the absence (as explained previously) you must also spend at least 60 minutes outside of class on this course with me or with a tutor, but they will need to sign a note that documents this made-up time. Also I will allow you to excuse a test day for a documented medical absence as long as you also make up the test with me or in the testing center. If you have 3 weeks or more of unexcused absences, I reserve the right to drop you from this class with a grade of 'F', which is university policy.

Good Advice Concentrate on learning the material of the course rather than worrying about your grade. Your time is best spent concentrating on the material to be learned in the impending assignments, asking questions, and devoting yourself to activities that will help you learn the material and do better in the course. I will worry about the details of your grade since you doing so does not help you earn a higher grade. But learning the material and doing well on the tests *will* help your grade. **Remember that math is not a spectator sport**, so the more problems you work yourself, and the more practice you get, the more confident you will be, and you will do better in this course. Working on the problems helps you to figure out what your specific questions are. Remember an individual homework or quiz grade may not count for a lot in your overall grade, but working and learning from the homework and quizzes is **essential** because this is where you learn the topics that will appear on the tests, which do count for a lot of your grade. The best lessons learned often come from correcting a quiz or homework problem in which you have made a mistake.

More Good Advice

Keep absences to a minimum. You never know when you might miss something important either from the lecture or class discussion such as questions other students ask. Remember: **YOU ARE RESPONSIBLE FOR EVERYTHING THAT IS DISCUSSED DURING CLASS WHETHER YOU ARE PRESENT OR NOT.**

Also do not allow yourself to develop bad habits such as missing classes. It's human nature to be controlled by our habits, so once you develop a weekly habit for the semester, it can be hard to break this habit. So be sure that you allow the necessary time for this course **FROM THE BEGINNING OF THE TERM, ESPECIALLY** if you consider mathematics to not be your best subject. If you have trouble in math, then you should attend **EVERY** class of a college mathematics course. Not showing up to class or not doing the required work will not cause this class to magically go away. If you are not understanding the material and/or have fallen behind in your work, missing class will not help. **IF YOU FALL BEHIND, PLEASE DO NOT DROP THIS COURSE WITHOUT TALKING TO ME FIRST.** Making mistakes or falling behind is natural, so it is best to talk to

me about this. If you do have to miss class, let me know beforehand. Discuss with me what you are not understanding. It is essential to get your questions answered. But meeting with me outside of class is not a substitute for attending class.

Ask questions no matter how easy or trivial they may seem. There is no such thing as a bad or silly question. Questions result when you are interested and have been thinking about areas, such as mathematics, in which you have limitations in your educational background. Being in a college mathematics course means you will have questions both obvious and more subtle. Asking questions is a very important part of learning.

Study and work problems regularly—every day or every other day. Work on assignments discussed in class as soon as you can after class while the methods discussed are still fresh in mind. You can't expect to succeed in a math course by waiting till the last minute to only study and cram prior to a test. If you promise yourself you will study for a ½-hour, get into the work, forget the clock, then the next thing you know, you've studied and worked for one to two hours. Remember that

LEARNING FROM MISTAKES + PERSISTENCE = SUCCESS!

Program Marketable Skills:

Marketable Skill (MS) 1: Students Demonstrate Logical and Analytical Skills.

MS 2: Students Demonstrate Problem-Solving Using Analytic and Algebraic Methods.

MS 3: Students Use Technology in Problem-Solving and Presentation.

MS 4: Students Use Communication and Pedagogical Skills.

Classroom Conduct It is important to conduct yourself in a college classroom so that everyone can benefit from good communication between instructor and students. My goal is to create an environment in which everyone can do their best work, learn, and make the best grades possible.

I think you will find that I am a very friendly, sympathetic, and generous instructor as long as you are sincerely working to succeed in this course and certain guidelines for classroom behavior are followed to allow a sanctity of study for your fellow students. Habits such as holding conversations during class, or being engaged in activities not related to this course such as working on a different course or reading your cell-phone will work against the goals of this course and cause you to be counted absent and you will lose Class Study Grade credit. Also engaging with electronic communication devices of any kind during class or coming into class more than 5 minutes late or leaving early before class is dismissed circumvent the goals of this course and cause you to lose credit. My sympathy and generosity will quickly evaporate if I find that you are working against the goals of the course or that you are simply trying to get a good grade without learning or without honestly doing the required work. I want you to have every opportunity to learn and succeed in this course.

Please be aware of the rules for Academic Honesty that you will find in the Sul Ross Student Handbook. Use commonsense to think of anything else that will allow you to learn and do the best work that you can in this class, and for me to better help you do your best work. Remember that being registered for this course does not allow you to behave in any manner you wish during class. You must keep other people in mind. It is within university policy for me to send a student out of this class on a temporary or permanent basis if disruptions or interruptions like the types listed above persist.

Academic Integrity

Students in this class are expected to demonstrate scholarly behavior and academic honesty in the use of intellectual property. Students should submit work that is their own and avoid the temptation to engage in behaviors that violate academic integrity, such as turning in work as original that was used in whole or part for another course and/or professor; turning in another person's work as one's own; copying from professional works or internet sites without citation; collaborating on a course assignment, examination, or quiz when collaboration is forbidden. Students should also avoid using open AI sources unless permission is expressly given for an assignment or course. Violations of academic integrity can result in failing assignments, failing a class, and/or more serious university consequences. These behaviors also erode the value of college degrees and higher education overall.

ADA Statement

SRSU Accessibility Services. Sul Ross State University (SRSU) is committed to equal access in compliance with the Americans with Disabilities Act of 1973. It is SRSU policy to provide reasonable accommodations to students with documented disabilities. It is the student's responsibility to initiate a request each semester for each class. Students seeking accessibility/accommodations services must contact Mrs. Mary Schwartze Grisham, LPC, SRSU's Accessibility Services Director or Ronnie Harris, LPC, Counselor, at 432-837-8203 or email mschwartz@sulross.edu or ronnie.harris@sulross.edu. Our office is located on the first floor of Ferguson Hall, room 112, and our mailing address is P.O. Box C122, Sul Ross State University, Alpine, Texas, 79832.

Student Responsibilities Statement

All full-time and part-time students are responsible for familiarizing themselves with the Student Handbook and the Undergraduate & Graduate Catalog and for abiding by the University rules and regulations. Additionally, students are responsible for checking their Sul Ross email as an official form of communication from the university. Every student is expected to obey all federal, state and local laws and is expected to familiarize him/herself with the requirements of such laws.

SRSU Distance Education Statement

Students enrolled in distance education courses have equal access to the university's academic support services, such as library resources, online databases, and instructional technology support. For more information about accessing these resources, visit the SRSU website.

Students should correspond using Sul Ross email accounts and submit online assignments through Blackboard, which requires a secure login. Students enrolled in distance education courses at Sul Ross are expected to adhere to all policies pertaining to academic honesty and appropriate student conduct, as described in the student handbook. Students in web-based courses must maintain appropriate equipment and software, according to the needs and requirements of the course, as outlined on the SRSU website. Directions for filing a student complaint are located in the student handbook.

Counseling

Sul Ross has partnered with TimelyCare where all SR students will have access to nine free counseling sessions. You can learn more about this 24/7/365 support by visiting

Timelycare/SRSU. The SR Counseling and Accessibility Services office will continue to offer in-person counseling in Ferguson Hall room 112 (Alpine campus), and telehealth Zoom sessions for remote students and RGC students.

Classroom Climate of Respect

Importantly, this class will foster free expression, critical investigation, and the open discussion of ideas. This means that all of us must help create and sustain an atmosphere of tolerance, civility, and respect for the viewpoints of others. Similarly, we must all learn how to probe, oppose and disagree without resorting to tactics of intimidation, harassment, or personal attack. No one is entitled to harass, belittle, or discriminate against another on the basis of race, religion, ethnicity, age, gender, national origin, or sexual preference. Still we will not be silenced by the difficulty of fruitfully discussing politically sensitive issues.

Supportive Statement

I aim to create a learning environment for my students that supports various perspectives and experiences. I understand that the recent pandemic, economic disparity, and health concerns, or even unexpected life events may impact the conditions necessary for you to succeed. My commitment is to be there for you and help you meet the learning objectives of this course. I do this to demonstrate my commitment to you and to the mission of Sul Ross State University to create a supportive environment and care for the whole student as part of the Sul Ross Familia. If you feel like your performance in the class is being impacted by your experiences outside of class, please don't hesitate to come and talk with me. I want to be a resource for you.

Important Dates (16-week term)

Mon, Aug. 25	First day of classes, first day of late registration
	and schedule changes
Thu, Aug. 28	Last day for late registration and schedule changes
Mon, Sep. 1	Labor Day Holiday, No Classes
Wed, Sep. 10	12th Class Day: Last Day to Drop a Class Without
	Creating an Academic Record for 16- week Courses
Fri, Sep. 26	University as a Community Meal on the Mall
Mon, Oct. 20	Freshman Mid-Term Grades are Due
Fri, Nov. 7	Last day to drop a class with a grade of "W" for 16-week term
	by 4 pm in University Registrar's Office
Wed-Fri, Nov. 26-28	Thanksgiving Holidays, No Classes
Wed, Dec. 3	Last Day of Class before Finals
Thu, Dec. 4	Dead Day, No Classes
Fri, Mon-Wed: Dec. 5, 8-10	Final Exams, End of Term

Tentative Class Schedule-Math 1342, Sec. 002 Fall 2025		
X = no class	Mon	Wed
Aug. 25, 27	First Day of Class Ch 1: Types of Statistics	Ch 1: Types of Statistics
Sep. 3	X - Labor Day Holiday	Ch 1: Types of Statistics
Sep. 8, 10	Qualitative, Quantitative Data Continuous, Discrete	How to Critique a Study Ch 2: Frequency Distributions
Sep. 15, 17	Ch 3: Measures of Center Mean, Median, Mode	Measures of Dispersion Range, Variance, Standard Deviation
Sep. 22, 24	Measures of Dispersion Range, Variance, Standard Deviation	Review for Test 1
Sep. 29, Oct. 1	Test 1	Percentiles, Quartiles 5-number Summary Box Plot
Oct. 6, 8	Sec. 4.1: Introduction to Probability	Probability Laws
Oct. 13, 15	Counting Rules	Ch. 5: Discrete Random Variables, Expected Value
Oct. 20, 22	Ch. 5: Discrete Random Variables, Expected Value	Ch. 6: Normal Distribution
Oct. 27, 29	Ch. 6: Probability of a Normal Distribution	Review for Test 2
Nov. 3, 5	Test 2	Ch. 7: Sampling Distributions and the Central Limit Theorem
Nov. 10, 12	Ch. 7: Sampling Distributions and the Central Limit Theorem	Central Limit Theorem with Means
Nov. 17, 19	Ch. 8: Estimating Population Means Student's t -distribution	Estimating Population Means with sigma Unknown
Nov. 24	Ch. 10: Hypothesis Testing for Population Means sigma Known	X - Thanksgiving Holiday No Classes Nov. 26-28
Dec. 1, 3	Ch. 10: Hypothesis Testing for Population Means sigma Unknown	Review for Test 3
Dec. 9	Tue, Dec. 9, Test 3 (Final Exam) 10:15a-12:15p
