Office of Information Technology

Email Best Practice

Sul Ross Email SR email primary abc12xy@sulross.edu and may have an alias first.last@sulross.edu. All emails addresses are on our website and are available to the public. SR email accounts are deleted once employee status has been set with a termination date. This will delete all emails and will not be able to be retrieved.

Any and all business communication should be communicated using your SR email address. Personal email should be used for all other communication like banking and bills.

Conditional Access is for employees who have to leave the country and need access to their accounts. This request can be submitted via email to ltac@sulross.edu for access to be granted.

Phishing attempts and SPAM emails: Phishing emails are actively aiming to steal your login credentials and other sensitive data. SPAM is unsolicited and unwanted junk email that can be damaging if you open or respond.

If you receive an email that you think is a phishing attempt please forward the email to abuse@sulross.edu.
