

5 Ways to Build Reading Fluency Using Evidence-Based Practices

Trisha A. Hunter and Dadra M. Ross
Sul Ross State University
ED 5325: Evidence Based Practices, Dr. Lisa Sousa

Peer Coaching

- Pair students based on reading ability
- Train the stronger reader to provide proper feedback
- Progress Monitor
- Repetition is key

Repeated Reading

- Teacher-led at student's instructional reading level
- Provide feedback on errors and growth (fluency and accuracy rate)
- Listening Passage Preview is also beneficial when paired with repeated reading

Modeling

Modeling fluency through shared reading can come from a parent or guardian, teacher, pre-recorded text, or higher-level peer.

Improve a student's prosody with exposure to expressive reading, which includes reading with proper intonations and phrasing throughout a passage (Wendling & Mathers, 2009).

Word Recognition Drills

- Stores words into Long Term Memory
- Error Word Drill
- Incremental Rehearsal

Individualized Goal Setting

- Targeted to specific performance standards, explicit, and attainable
- Provide goal-specific feedback
